SUPERVISORY PATENT EXAMINER

Reason for Allowance

The prior art references of records (US 6,020,792; US 5,541,456) show a method of changing the SET/RESET latch output having first state and second state. The references of records fail to show that the SET/RESET circuit including a first latch transistor having a base coupled by a resistive element to the base of the SET transistor, and using a portion of a first current to bias the SET transistor at an operational point lower than a first threshold; a second latch transistor having a base coupled by a resistive element to the base of the RESET transistor, and using a portion of a first current to bias the RESET transistor at an operational point lower than a second threshold as called for in claims 40. Therefore, claims 40-44 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
